BROADBRIM. Colonel Henry W. Cleveland, before the war editor of the Atlanta (Ga.) Daily Constitutionalist, and an officer of the Southern Army from 1861 to 1865, reappears in current literature as the author of No. 13 of the New York Tribune "Novel" extras. Colonel Cleveland will also be remembered among the people of the South as the biographer of Vice-President Stephens. The story of "Drifted by the Sea" is very simple, and remarkably well told. A whale-ship burns in the South Pacific, in 1846, and the carpenter, John Waldron, is saved. The drift of the great Pacific mid-ocean current, casts the masts to which he is lashed upon a beautiful island, rich in the birds, flowers and trees of all lands planted by a lost race or drifted there by the currents. On the opposite shore of the small island he finds a bewitching little girl of tender years, and as this ship of her's is in fair order, they find in it all of the conveniences of life, and some luxuries. It turns out that this carpenter learned his trade as the younger and outcast son of a noble family, but later gets his estates and titles by death. He marries a Spanish lady, and has a girl child by her. At last he becomes jealous of a Major, who is his friend, and thinks that he kills him in a storm. This duel in the storm is a fine piece of dramatic writing, but not overdrawn. The carpenter-noble man flies the realm, and after some vears of wandering is cast on the

He has only three senses, nearing, seeing and smelling. He has no more sense of taste than a stone jug, and will eat anything that contains nutriment, and he don't care two cents whether it be one per cent. or ninety-nine. -All he asks is to pass him along his plate, with whatever happens to be handy round the rantry, and he won't go away and blow how poor the steak is. He just eats whatever is set before him, and asks no questions.

Mules are naturally deaf, but that supreme wisdom that teaches the little boy to wipe his nose on his sleeve, has fitted the mule out with a pair of ears that counteracts its deafness, so he can hear as readily as a person when you don't want him to. reached his stick over the front of the wagon, and stuck the brad into that mule. It was awful to see a man snuffed out as quickly as he was. It almost took away my breath he went so suddenly. I never saw the thread of life snap so abruptly as it did on that occasion. He didn't have time to leave a message for his family. That mule simply ducked his head, and then a pair of heels flew out behind; there was a crash, a flying of splinters, and that was all, and the next moment that mule and I stood alone, my face covered with astonishment two feet deep, and his covered with a part of an old bridle. If I had my choice, to either work there would be more possibility of my friends finding some little mementoes of me, with which to aspiece of me would lighten a very

big sorrow. I will hunt around, and if I find any other facts that belong to the mule, I will write them down, and send them to you by express C. A mule never grows old or dies. O. D.
